

Quasar

3rd Generation Ultra Low Latency PTP Radio System

Delivering Low Latency Solutions for Customers Worldwide

Features

- Indoor Unit for End Site Locations
- Outdoor Unit for Repeater Site Locations - minimize ODU to ODU cable length and delay
- 10 Gig and 1 GIG SFP Traffic Interfaces
- Ethernet Payload Compression
- Cielo Networks proprietary BBB Mode Operation for lowest latency solution
- Repeater Configuration supports both Symbol Regen and IF Repeater Operation
- HSB + Space Diversity with customized repeater site solution minimizing latency
- 28/30/40/50/56 MHz Channel Bandwidth
- Licensed band PTP digital microwave system for all FCC/ETSI bands at 6/7/8/11/13/15/18/ 23/26/39 GHz
- High Power ODU Solutions for 6 to 11 GHz
- SNMP remote management
- User friendly Web GUI management solution
